FINANCIÁL AND COMMERCIAL

New York, July 19.—The shadow of further labor difficulties hung over the stock market today, reports from Chicago and other railroad terminals indicating that the unions would probably protest against the wage increase award of the railway labor board.

Mexican affairs also presented less fa-

vorable aspects and the various oil shares with concessions in that country were under frequent pressure, affecting sympathetically numerous kindred issues, including motors and their accessories. Financial conditions were less acute, last week's exhibit of the local federal reserve hank and the clearing house as-sociation offering ground for the belief that the credit situation at this center is

that the creat struction at this center is lending towards ease.

This was in a cout by the day's movements of demand loans, which opened at 9 per cent, but relaxed to 8 in the last your, when the market, especially in stanfard industrials, rallied substantially. The outstanding featue of the trading, however, apart from its duliness, was the

absolute aloofness of public interest or support of any kind, save that vouchsafed by pools and cliques in selected issues. Final prices were irregular, a few favor-tes such as Crucible and Stromberg thowing net gains. Sales amounted to 215,000 shares. 115,000 shares.

Heavy selling of remittances to Lonfon effected further depreciation of cable
and demand bills, the latter falling to
12.82, with concurrent reaction on the
Paris rate and other continental exthanges, including marks.
